Technische Details I

OTL Power Amplifier Mk II

Das Impuls-Rechteckverhalten der Futterman-OTL-Schaltungen im Vergleich.

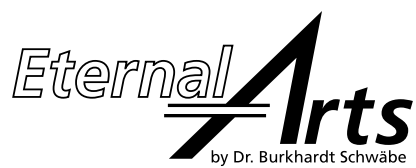

The square wave impulse response of the Futterman circuitry in comparison

COMPARATIVE SQUARE WAVE RESPONSE

	10 hz	100 hz	1K	15K	25K
SYSTEM FUTTERMAN					
MARANTZ 8B					
MCINTOSH 275					

The reason we are comparing the Futterman amplifier with the Marantz 8b and McIntosh 275 is that these represent the highest developments in output transformers and output transformers used in the current transformer coupled tube amplifiers don't even come close to their performance. You will note in these tests the inability of transformer coupled amplifiers to reproduce low frequencies and high frequencies without serious distortion and ringing that occurs at frequency extremes.
